

## Question 1

Correct

Mark 1.00 out of 1.00

A company adopts leading-edge networking technology despite lacking trained staff and stable documentation. The MOST probable consequence is:

- ☐ a. Immediate operational stability
- ☒ b. Increased operational risk and support difficulty
- ☐ c. Reduced troubleshooting complexity
- ☐ d. Elimination of scalability concerns

The correct answer is: Increased operational risk and support difficulty

## Question 2

Correct

Mark 1.00 out of 1.00

A company chooses many inexpensive servers instead of a few high-end systems. The PRIMARY trade-off is between:

- ☐ a. Documentation and monitoring
- ☒ b. Reliability and manageability
- ☐ c. Security and DNS resolution
- ☐ d. Scalability and portability

The correct answer is: Reliability and manageability

## Question 3

Correct

Mark 1.00 out of 1.00

A company deploys highly available servers but lacks proper documentation and escalation procedures. During an outage, recovery is delayed because no one understands the failover process. Which principle failure contributed MOST to the incident?

- ☐ a. Automation
- ☒ b. Communication
- ☐ c. Centralization
- ☐ d. Vendor neutrality

The correct answer is: Communication

## Question 4

Correct

Mark 1.00 out of 1.00

A company has excellent network hardware. During an outage, recovery is delayed because administrators cannot identify device configurations or dependencies. Which practice would MOST reduce future downtime?

- ☐ a. Replacing all switches annually
- ☒ b. Maintaining comprehensive network documentation
- ☐ c. Increasing Internet bandwidth
- ☐ d. Purchasing higher-performance routers

The correct answer is: Maintaining comprehensive network documentation

## Question 5

Correct

Mark 1.00 out of 1.00

A company performs backups regularly but never tests restoration. What is the MOST significant risk?

- ☐ a. Increased WAN latency
- ☒ b. Recovery procedures may fail during an actual disaster
- ☐ c. Reduced recovery performance
- ☐ d. Resulting longer system downtimes

The correct answer is: Recovery procedures may fail during an actual disaster

## Question 6

Correct

Mark 1.00 out of 1.00

A system administrator segments a LAN to isolate traffic and apply different policies to departments. Which device primarily enables this functionality?

- ☒ a. Switch
- ☐ b. Firewall
- ☐ c. NAS
- ☐ d. Router

The correct answer is: Switch

## Question 7

Correct

Mark 1.00 out of 1.00

Data integrity means ensuring that data:

- ☐ a. A state of data
- ☐ b. Can be only accessed by authorized parties
- ☒ c. Is not altered by unauthorized or unintended sources
- ☐ d. Can be proven of the origin of the data in front of a third party

The correct answer is: Is not altered by unauthorized or unintended sources

## Question 8

Correct

Mark 1.00 out of 1.00

If a disaster has a low probability but extremely high financial impact, the organization will MOST likely:

- ☒ a. Consider investing in mitigation measures
- ☐ b. Ignore mitigation entirely
- ☐ c. Eliminate all backup systems
- ☐ d. Avoid performing risk analysis

The correct answer is: Consider investing in mitigation measures

Question **9**

Correct

Mark 1.00 out of 1.00

In a client-server environment, clients primarily:

- ☐ a. Provide centralized services
- ☐ b. Replace server infrastructure
- ☒ c. Consume services provided by servers
- ☐ d. Manage network routing

The correct answer is: Consume services provided by servers

Question **10**

Correct

Mark 1.00 out of 1.00

Risk analysis primarily involves determining:

- ☐ a. Employee salaries and bonuses
- ☐ b. Network threats
- ☒ c. Types of disasters and their likelihood
- ☐ d. Software development timelines

The correct answer is: Types of disasters and their likelihood

Question **11**

Correct

Mark 1.00 out of 1.00

The PRIMARY goal of disaster recovery (DR) is to:

- ☐ a. Ensure systems are always offline during maintenance
- ☐ b. Eliminate all business risks completely
- ☒ c. Prepare systems and processes for rapid recovery
- ☐ d. Replace all hardware annually

The correct answer is: Prepare systems and processes for rapid recovery

Question **12**

Correct

Mark 1.00 out of 1.00

What is identified as the FIRST step in building a disaster recovery plan?

- ☐ a. Replacing damaged hardware
- ☐ b. Purchasing backup servers
- ☐ c. Training the helpdesk
- ☒ d. Performing a risk analysis

The correct answer is: Performing a risk analysis

Question **13**

Correct

Mark 1.00 out of 1.00

What is the PRIMARY advantage of off-site storage?

- ☐ a. Reduced software licensing costs
- ☐ b. Faster CPU performance
- ☒ c. Protection against site-wide disasters
- ☐ d. Elimination of malware infections

The correct answer is: Protection against site-wide disasters

Question **14**

Correct

Mark 1.00 out of 1.00

What is the PRIMARY benefit of centralized backup management?

- ☒ a. Improved policy consistency and administration
- ☐ b. Faster workstation boot times
- ☐ c. Reduced file permissions
- ☐ d. Elimination of storage requirements

The correct answer is: Improved policy consistency and administration

Question **15**

Correct

Mark 1.00 out of 1.00

Which action BEST demonstrates professional integrity in system administration?

- ☐ a. Concealing configuration mistakes from management
- ☐ b. Disabling logging to reduce storage consumption
- ☒ c. Documenting administrative actions and following established procedures
- ☐ d. Sharing privileged access credentials during emergencies

The correct answer is: Documenting administrative actions and following established procedures

Question **16**

Correct

Mark 1.00 out of 1.00

Which action would MOST improve resilience in a rapidly growing organization?

- ☐ a. Allowing unrestricted local configurations
- ☒ b. Centralizing core infrastructure management
- ☐ c. Increasing individual administrator privileges
- ☐ d. Eliminating change approval processes

The correct answer is: Centralizing core infrastructure management

Question **17**

Correct

Mark 1.00 out of 1.00

Which administrative action MOST directly improves confidentiality?

- ☐ a. Using hashing to store passwords
- ☐ b. Increasing network throughput
- ☐ c. Take strong actions to maintain the integrity
- ☒ d. Restricting access using permissions and authentication

The correct answer is: Restricting access using permissions and authentication

Question **18**

Correct

Mark 1.00 out of 1.00

Which administrative activity MOST directly reduces vulnerability/flaws exposure?

- ☒ a. Applying security patches promptly after testing
- ☐ b. Increasing local storage capacity
- ☐ c. Reducing password expiration requirements
- ☐ d. Expanding user access permissions

The correct answer is: Applying security patches promptly after testing

Question **19**

Correct

Mark 1.00 out of 1.00

Which characteristic is MOST important in effective help desk communication?

- ☐ a. Escalating every issue immediately
- ☐ b. Prioritizing technical terminology over clarity
- ☐ c. Minimizing all user interaction
- ☒ d. Providing clear, professional, and understandable guidance

The correct answer is: Providing clear, professional, and understandable guidance

Question **20**

Correct

Mark 1.00 out of 1.00

Which factor is MOST critical before moving a data center?

- ☐ a. Purchasing additional workstations
- ☐ b. Reducing monitoring alerts
- ☒ c. Performing full backups and testing recovery
- ☐ d. Replacing all network switches

The correct answer is: Performing full backups and testing recovery

Question **21**

Correct

Mark 1.00 out of 1.00

Which factor MOST directly contributes to high system availability?

- ☐ a. Removing redundant infrastructure to reduce complexity
- ☐ b. Increasing the number of local administrator accounts
- ☒ c. Designing systems with redundancy and fault tolerance
- ☐ d. Performing maintenance only after failures occur

The correct answer is: Designing systems with redundancy and fault tolerance

Question **22**

Correct

Mark 1.00 out of 1.00

Which factor should MOST influence disaster mitigation spending decisions?

- ☐ a. Internet bandwidth utilization level
- ☐ b. Hardware brand popularity
- ☒ c. Estimated risk probability and financial impact
- ☐ d. Number of employees in the organization

The correct answer is: Estimated risk probability and financial impact

Question **23**

Correct

Mark 1.00 out of 1.00

Which factor should MOST influence the selection of a server operating system?

- ☐ a. Popularity among the product users
- ☐ b. Multimedia performance capabilities
- ☐ c. User interface appearance
- ☒ d. Stability, security, and workload requirements

The correct answer is: Stability, security, and workload requirements

Question **24**

Correct

Mark 1.00 out of 1.00

Which mechanism MOST directly protects data integrity in enterprise systems?

- ☐ a. Increasing network bandwidth allocation
- ☐ b. Reducing audit logging frequency
- ☒ c. Controlled modification procedures and validation mechanisms
- ☐ d. Expanding local storage availability

The correct answer is: Controlled modification procedures and validation mechanisms

Question **25**

Correct

Mark 1.00 out of 1.00

Which of the following is MOST likely to be configured on a server system?

- ☐ a. Personal media library
- ☒ b. Web hosting service
- ☐ c. Gaming software
- ☐ d. Video editing software

The correct answer is: Web hosting service

Question **26**

Correct

Mark 1.00 out of 1.00

Which OSI layer directly interacts with user applications such as web browsers and email clients?

- ☒ a. Application
- ☐ b. Session
- ☐ c. Transport
- ☐ d. Presentation

The correct answer is: Application

Question **27**

Correct

Mark 1.00 out of 1.00

Which practice BEST balances security and usability?

- ☐ a. Requiring administrative approval for every routine action
- ☐ b. Prioritizing convenience regardless of security exposure
- ☐ c. Restricting all user access to minimize security incidents
- ☒ d. Implementing strong controls while allowing users to complete tasks efficiently

The correct answer is: Implementing strong controls while allowing users to complete tasks efficiently

Question **28**

Correct

Mark 1.00 out of 1.00

Which principle is MOST closely associated with informed consent?

- ☐ a. Restricting users from requesting support services
- ☐ b. Encrypting all communications within the organization
- ☐ c. Preventing all system downtime automatically
- ☒ d. Transparency before performing impactful administrative actions

The correct answer is: Transparency before performing impactful administrative actions

Question **29**

Correct

Mark 1.00 out of 1.00

Which situation BEST demonstrates proper handling of law enforcement requests?

- ☐ a. Sharing administrative credentials temporarily for investigation purposes
- ☒ b. Verifying identity and following organizational procedures before disclosure
- ☐ c. Providing requested logs immediately without verification
- ☐ d. Refusing all requests regardless of legal authority

The correct answer is: Verifying identity and following organizational procedures before disclosure

Question **30**

Correct

Mark 1.00 out of 1.00

Which situation MOST likely requires escalation to higher-level support?

- ☒ a. A network outage affecting multiple departments
- ☐ b. A request for printer installation
- ☐ c. A routine password reset request
- ☐ d. A user asking for desktop customization assistance

The correct answer is: A network outage affecting multiple departments

Question **31**

Correct

Mark 1.00 out of 1.00

Which statement BEST describes the role of an operating system?

- ☐ a. It stores backups permanently
- ☐ b. It replaces application software
- ☒ c. It manages hardware resources and provides services for applications
- ☐ d. It only provides internet access

The correct answer is: It manages hardware resources and provides services for applications

Question **32**

Correct

Mark 1.00 out of 1.00

Which statement BEST differentiates security policies from procedures?

- ☐ a. Policies only apply to management personnel
- ☒ b. Policies define rules and objectives; procedures describe implementation steps
- ☐ c. Policies are optional, while procedures are legally binding
- ☐ d. Procedures define organizational goals; policies describe hardware settings

The correct answer is: Policies define rules and objectives; procedures describe implementation steps

Question **33**

Correct

Mark 1.00 out of 1.00

Which statement BEST explains the purpose of backups?

- ☒ a. To recover systems and data after failures
- ☐ b. To reduce storage usage
- ☐ c. To reduce the cost
- ☐ d. To improve processor speed

The correct answer is: To recover systems and data after failures

Question **34**

Correct

Mark 1.00 out of 1.00

Which statement BEST explains the relationship between technical authority and ethics in system administration?

- ☐ a. Greater technical authority reduces ethical responsibility
- ☐ b. There is no connection between technical authority and ethics
- ☐ c. Ethical concerns are primarily management responsibilities
- ☒ d. Administrative privileges increase the importance of ethical conduct

The correct answer is: Administrative privileges increase the importance of ethical conduct

Question **35**

Correct

Mark 1.00 out of 1.00

Which statement BEST explains why social engineering is dangerous?

- ☐ a. It bypasses physical security mechanisms automatically
- ☒ b. It exploits human trust rather than technical vulnerabilities alone
- ☐ c. It permanently disables backup systems remotely
- ☐ d. It only affects outdated operating systems

The correct answer is: It exploits human trust rather than technical vulnerabilities alone

Question **36**

Correct

Mark 1.00 out of 1.00

Which statement BEST reflects the definition of system administration?

- ☐ a. It is primarily hardware maintenance
- ☐ b. It focuses mainly on operating system troubleshooting
- ☒ c. It combines technical and organizational responsibilities
- ☐ d. It is independent of organizational communication

The correct answer is: It combines technical and organizational responsibilities

Question **37**

Correct

Mark 1.00 out of 1.00

Why are standard operating system configurations important in organizations?

- ☐ a. They reduce monitor usage
- ☐ b. They increase internet bandwidth
- ☒ c. They simplify administration and troubleshooting
- ☐ d. They eliminate security threats completely

The correct answer is: They simplify administration and troubleshooting

Question **38**

Correct

Mark 1.00 out of 1.00

Why are tested backups significantly more valuable than untested backups?

- ☐ a. Untested backups increase recovery speed automatically
- ☒ b. Successful restoration capability is verified through testing
- ☐ c. Backup testing eliminates the need for redundancy
- ☐ d. Tested backups require less storage space

The correct answer is: Successful restoration capability is verified through testing

Question **39**

Correct

Mark 1.00 out of 1.00

Why is documentation considered essential in system administration?

- ☒ a. It supports consistency, troubleshooting, and knowledge transfer
- ☐ b. It prevents all configuration-related failures automatically
- ☐ c. It eliminates the need for technical training
- ☐ d. It replaces automated monitoring systems entirely

The correct answer is: It supports consistency, troubleshooting, and knowledge transfer

Question **40**

Correct

Mark 1.00 out of 1.00

Why is social engineering considered a major security threat despite strong technical controls?

- ☒ a. It targets human behavior rather than technical vulnerabilities
- ☐ b. It disables all backups automatically
- ☐ c. It targets system behavior rather than technical vulnerabilities
- ☐ d. It directly affects the integrity of the information

The correct answer is: It targets human behavior rather than technical vulnerabilities
