LECTURE 05- INNOVATING WITH TECHNOLOGY, SYSTEMS AND
INFORMATION

What is meant by Innovation?

Innovation in its modern meaning is "a new idea, creative thoughts, new imaginations in form of device or method". **Innovation** is often also viewed as the application of better solutions that meet new requirements, unarticulated needs, or existing market needs.

Innovation Is:

Not Just Products and Technology. – Innovation needs to be understood in a broad context – it is about **innovation in all aspects of the business**, including processes, services, methods, management practices, strategy and business design, not just products and technology.

Innovation today is not just about new products. It is about;

- **Using technology strategically**
- **Leveraging systems effectively**
- **Transforming data into actionable information**

Key Technologies Driving Innovation

- Cloud Computing
- Artificial Intelligence (AI)
- Internet of Things (IoT)
- Big Data Analytics
- Augmented Reality

Phases of Innovation

Innovation = Technology + Systems + Information

How Systems Enable Innovation

- Automate business processes (ERP systems)
- Improve decision-making (MIS, DSS)
- Enhance customer experience (CRM systems)

Why Information Matters

- Supports strategic decision-making
- Enables predictive analytics
- Improves customer understanding
