

IT Procurement Management

IS4105- Lecture 01

Presenter- PKDK Kaushalya

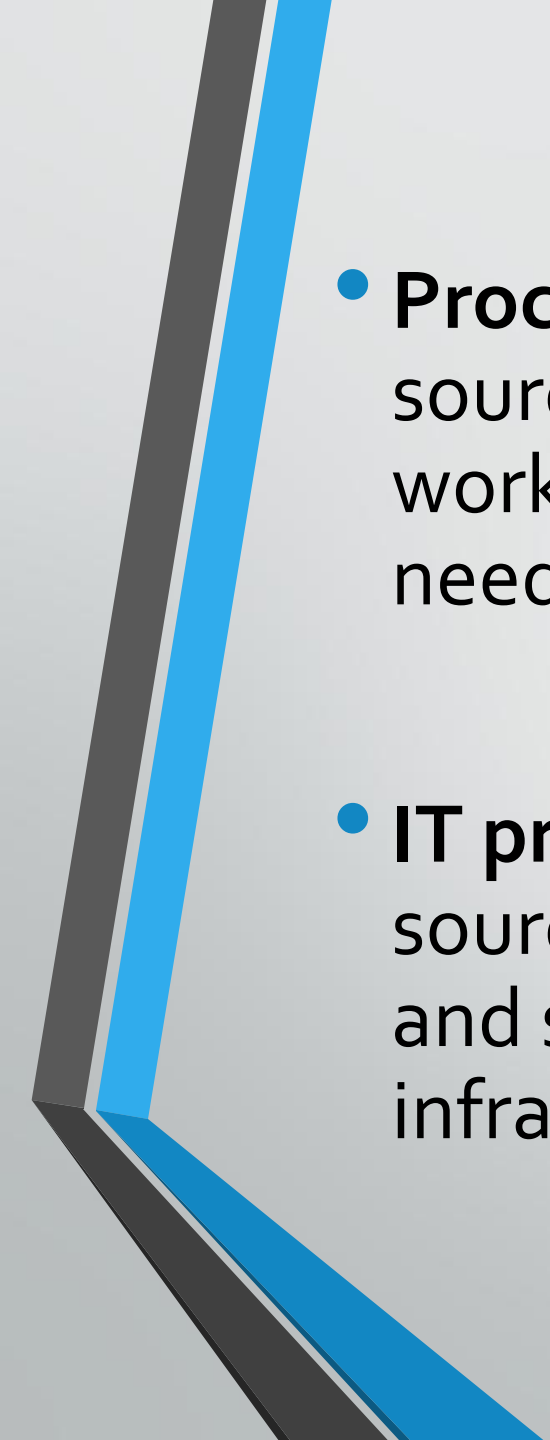

Introduction to IT Procurement Management

What is meant by Procurement?

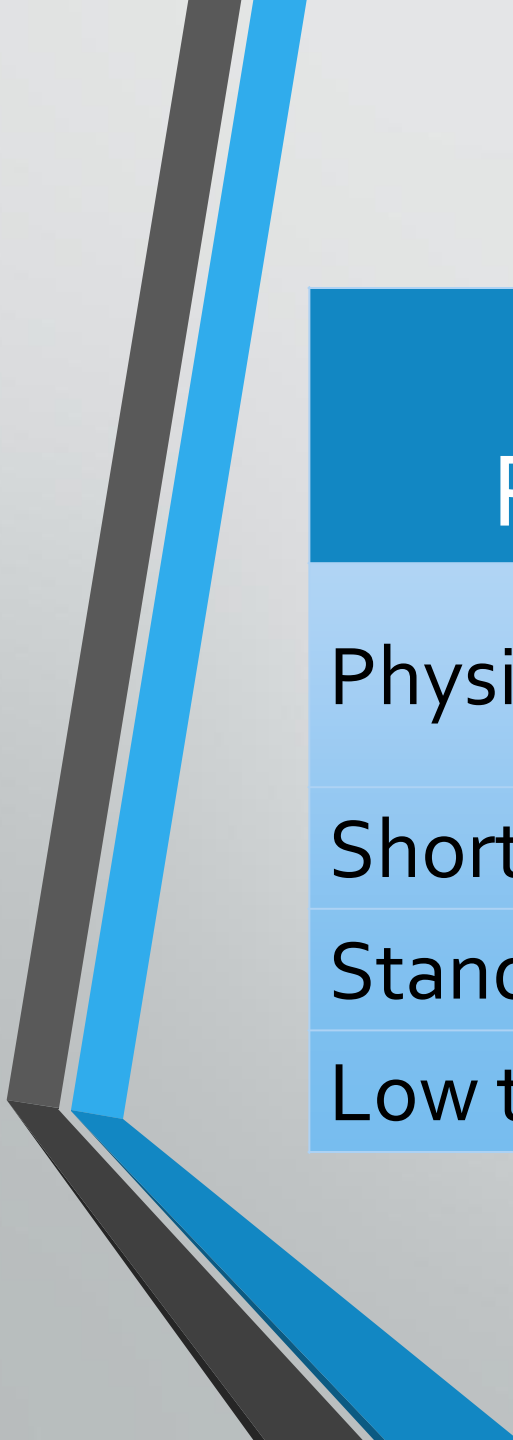

Procurement is the process of acquiring goods, services, or works from external sources in a structured and strategic manner.

- 
- **Procurement** is the strategic, end-to-end process of sourcing, negotiating, and acquiring goods, services, or works from external suppliers to meet organizational needs.
 - **IT procurement** is the strategic process of identifying, sourcing, acquiring, and managing technology products and services such as hardware, software, and cloud infrastructure to meet business goals.

Key Activities

- Identifying needs
- Selecting suppliers
- Negotiating contracts
- Purchasing
- Managing supplier relationships

Traditional Procurement	IT Procurement
Physical goods	Hardware, software, cloud services
Short lifecycle	Rapid technological change
Standard suppliers	Specialized vendors
Low technical risk	High technical dependency
